## Press Release - Server Backup

9/18/2012

### Idera's R1Soft Continuous Data Protection Powers CloudAccess.net's Compliant Cloud Backup For CapitalPlus Factoring

Leading National Asset Factoring Company Chooses CloudAccess.net and Idera for Backup and Disaster Recovery

HOUSTON, TX AND TRAVERSE CITY, MI - SEPTEMBER 18, 2012 - Today, Idera and CloudAccess.net announced that customer CapitalPlus, a leading national provider of asset factoring, has chosen to implement CloudAccess.net's Compliant Cloud Backup (CCB) service. CloudAccess.net's CCB service is a SaaS-based cloud enterprise-grade backup and disaster recovery service powered by Idera's award-winning backup solution R1Soft Continuous Data Protection® (CDP).

CapitalPlus implemented the CloudAccess.net CCB service because of its reliability, comprehensive features set and it enables CapitalPlus to maintain compliance with regulatory requirements. "With our financial industry regulatory compliance concerns, we couldn't just pick any backup and disaster recovery service," said Scott Applegate, CEO of CapitalPlus. "CloudAccess.net, with their Idera R1Soft-powered CCB service, gave us all of the great features we need in a SaaS model. Best of all, it was compliant with all of our regulatory requirements."

The CCB service, powered by Idera's R1Soft CDP, allows CloudAccess.net to offer a cloud-based backup and disaster recovery with ultrafast restore features and advanced security, auditability and accountability. This enables customers, like CapitalPlus, to comply with regulatory requirements such as PCI, GLB, HIPAA, SOX, etc.

"Our customers look to us as a leading provider for in-the-cloud, Platform-as-a-Service (PaaS) solutions," said Gary Brooks, CEO of CloudAccess.net. "It was natural for us to offer a best-in-class, cloud-based backup and disaster recovery software. We chose the same solution we use for our own backup needs—R1Soft CDP from Idera." Eliminating the upfront costs and CAPEX associated with traditional software purchases, CCB makes enterprise-grade backup and disaster recovery affordable. Both in-the-cloud and on premise data can be included in the service.

"We are proud to partner with a company like CloudAccess.net in bringing this cloud-based backup and disaster recovery solution to companies like CapitalPlus," said David Wartell, Vice President of Server Backup at Idera. "This kind of in-the-cloud solution represents the future of backup."
